I can get to the system screens fine, but whenever I try to log into my account it just stays on the screen with the spinning globe for a long time, and then it boots me back to the login screen. Anyone else have this issue? I've always had the highest level of support from InTune, and have never had any issues before. If anyone can help me, please do. EDIT: I have a Apple iPhone 4s (iOS 7.0.4) and a MacBook Pro. A: To completely delete InTune from the Mac, try this: Go to System Preferences -> Users & Groups Right click on your InTune account and click Show InTune. Right click on the InTune account and click Edit. Press Delete on the next screen and confirm. This may not work, but I'd like to see if it does. Please let me know if it worked. /* * Copyright (c) 2020 Proton Technologies AG * * This file is part of ProtonVPN. * * ProtonVPN is free software: you can redistribute it and/or modify * it under the terms of the GNU General Public License as published by * the Free Software Foundation, either version 3 of the License, or * (at your option) any later version. * * ProtonVPN is distributed in the hope that it will be useful, * but WITHOUT ANY WARRANTY; without even the implied warranty of * MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE.
